COMPACT 650 DD

High-performance shrink tunnel with four-way ring nozzle heating system.

The Compact 650 DD from Kallfass shrinks in an extremely energy-efficient manner, using only the required amount of energy for optimal product packaging results. This is accomplished using four individually adjustable heating zones with a continuously adjustable fan speed and 4-way frequency control. Ensuring careful use of the world's resources.

The figure may show optional equipment, ordered separately

Technical specifications

	Compact 650 DD
Adjustable working height	32" - 35"
Tunnel clearance width, height	25" / 4" or 8"
Length of the heated tunnel hood	71"
Power supply	208 - 480 Volt
Continuously adjustable temperature	up to 190°C/375°F
Transport speed	15' - 120' Minute
Installed heating capacity	4 x 4,5 KW

A total of four separately controllable ring nozzle heating systems provide uniform heat transfer to the packaged product.

An overview of the benefits

- Perfect packaging results using constantly uniform heat energy transfer to the packaged goods, regardless of the position on the conveyor belt
- Ring nozzle heating technology with integrated air circulating system for efficient energy recovery
- High level of insulation and compact design ensure fast warm-up times
- Easy adjustment of basic parameters (temperature, air volume and package speed) using continuously adjustable controller
- Intelligent technology ensures constant temperature during operation. Energy-intensive temperature fluctuations are prevented
- Carefully selected components, easy to maintain, maintenance-free plastic mesh belt

Solution with Kallfass quality. Competence in the production of a wide range of products, from individual units to packaging systems to integration into production lines.
