Horizontal bagging machine

LOGI WRAP 800 3D

This „super talent“ uses a measurement grid to identify the product dimensions and adapts the film packaging automatically to fit the product. Thus, tailor-dimensioned film packaging is always ensured. Regardless of whether shipping or return packaging, display or protective packaging, individual or container packaging, from now on you only need one machine to package your entire product range. The Logi Wrap 800 3D.

Technical specifications

	Logi Wrap 800 3D
Dimensions: length x width x height	71" x 51" x 83"
Transverse seal bar, length	33"
Seal bar clearance height	10"
Product length, min.	5"
Packaging capacity, max.	1800 cycles / hour
Film, flat film	up to 33"
Label printing / data connection	optional

The measurement grid identifies the product dimensions for each customized packaging

Your benefits highlighted

- Film bag with stable, durable side seals, completely sealed on all four sides
- Very small footprint. Machine is easy to integrate into the product flow of any supply chain with a minimum of space requirements, or can be used as a stand-alone solution
- After packing cycle, the product is discharged from the machine
- Packs reliably varying product dimensions in random order
- Capacity speed of up to 1800 cycles per hour
- All usual trade films, such as polyolefin, polyethylene, poly lactide acid (PLA), unprinted, printed, transparent or coloured (opaque) can be easily processed
- Easy integration of label printers and data connection

Solutions based on Kalfass quality. Competence in production of a wide range of packaging machines, from customer tailored systems to packaging systems for integration into production lines.

KALLFASS is certificated according to ISO 9001:2008
